THE BEST FLY SCREENS AVAILABLE IN THE UK

Our Fly Screens are the BEST in the UK for Bi-fold Doors, Corner Doors, French Doors, Multi-Pane Doors, Patio Doors, Sliding Doors and Slide & Stack Doors. They are made to measure, and provide a barrier to flying insects without stopping the flow of air.

WHAT IS A RETRACTABLE SCREEN?

Described simply, as the name implies, they retract. Best Fly Screens mesh concertinas into the frame. Best Fly Screens are mainly retrofitted and almost seamlessly blend into your door frame, making them hardly noticeable.

When opening, the mesh screen simply glides along in its rail, unfolding from the concertina closed position, allowing the fresh air in; it allows you to view the outside but protects you against flying insects or bugs entering your home.

How wide can a Best Fly Screen span?

Up to **4m (13.12 ft)** for a single opening screen and up to **8m (26.24 ft)** for a double opening screen.

OPEN the DOORS
let the air in
